Bears Basing Confidence on Weakening in Spots, But Sellers Conservative.

Thursday Afternoon, Oct. 24.

Bears are still displaying more
less confidence and are apparently ha

spots are gradually weakening. Quotations however, are still above futures, and that serves to encourage conservative action among sellers cipitals leans to the down side, as there is fittle activity in spots, and the claim is made that there is in resulty less underlying strength in them than appears on the surface or indicated by the quotations. Quotations in the contrary department did not change much to it, but there was little sign of recover, and no the bulges, which were credited to absorption of offerings by trade interests, mere pressure was displayed. The technical condition of the affair is naturally weaker, as prices have declined over 200 points recently, with a consequent short interest created, set the burden of preof appears to be on the believers in the bull side.

The weather in the belt continues favorable on the whole, although spore rains than are best lave been failing within the last day or so. Overnight some heavy ones fell in the lower part of the central held and more are promised. Including the entire eastern half of the belt. The western belt was promised fair and cooler, with possibly some frost in the upper part. The bears are assuming that the crop is still being added to, and they also expect the gibning report, due tomorrow morning at the opening, will show approximately 1,000,000 bales turned out. This will be fairly large, when it is considered that many gins have been closed down. It will commare with 5,719,815 to Sept. 25, with 5,52,606 to Oct. 18 last year and 7,303,183 to same date, two years ago. Liverpool was due to come 55 to 22 points to the bad, but finished 31 to 36 lower, tone called quiet. "The enemy will be condemned to restitutions, for which we will take guarantees, not being able to rely upon his word," said Stephen Pichon, foreign minister.
